Package

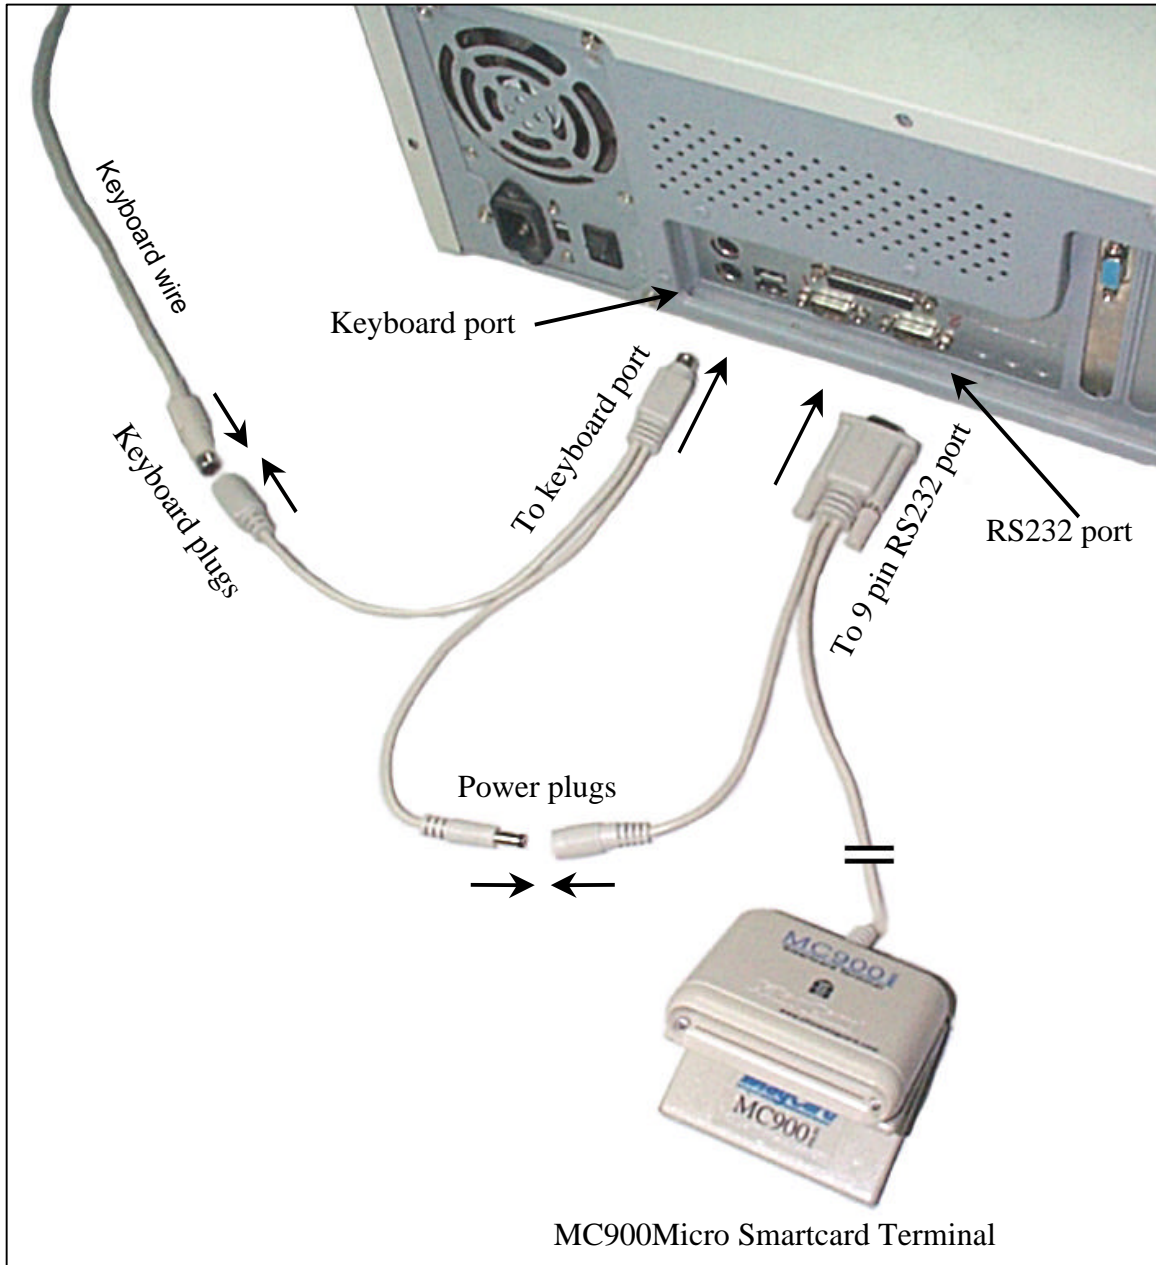

Your MC900Micro package includes the following items:

- The MC900Micro smartcard terminal
- The keyboard branch cable
- A 3.5`` disk contains the Manuals, demo program and drivers
- This 1-page installation guide
- A pedestal and 2 screws

Installation Instructions

These instructions are also demonstrated in graphics on next page.

1. Turn off the main power of the PC
2. Unplug the PC keyboard
3. Plug the supplied keyboard branch cable into the PC keyboard port
4. Plug the keyboard into the the other end of the keyboard branch cable
5. Plug the MC900Micro's 9 pin connector into one of the PC's free RS232 port. If all the RS232 ports on the PC are occupied, you may unplug one of them or install a RS232 add-on card into you PC to give a free RS232 port to MC900Micro
6. Plug the the two power plug on MC900Micro and keyboard branch cable together
7. The hardware portion is finished. Now turn on the PC and refer to the README.TXT in the supplied disk for the software installation and usage
8. You may use the two supplied screws to fix the MC900Micro on the supplied pedestal.
